Signup Page:

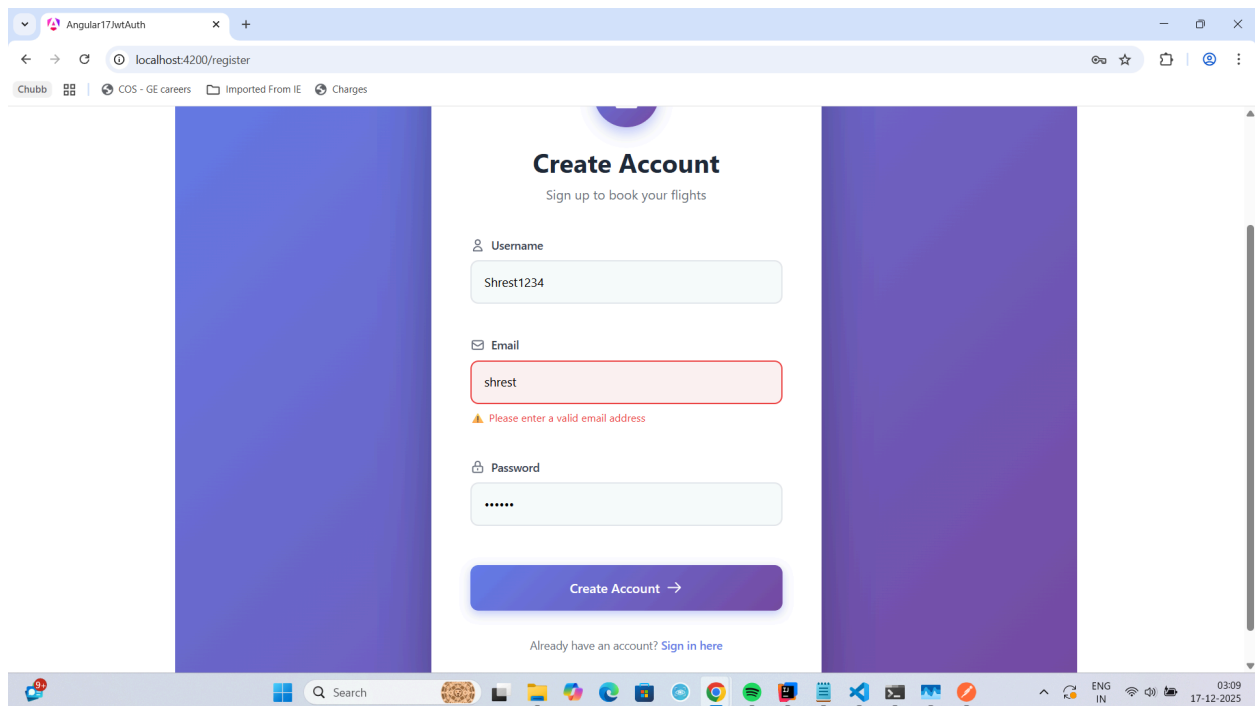

Email required :

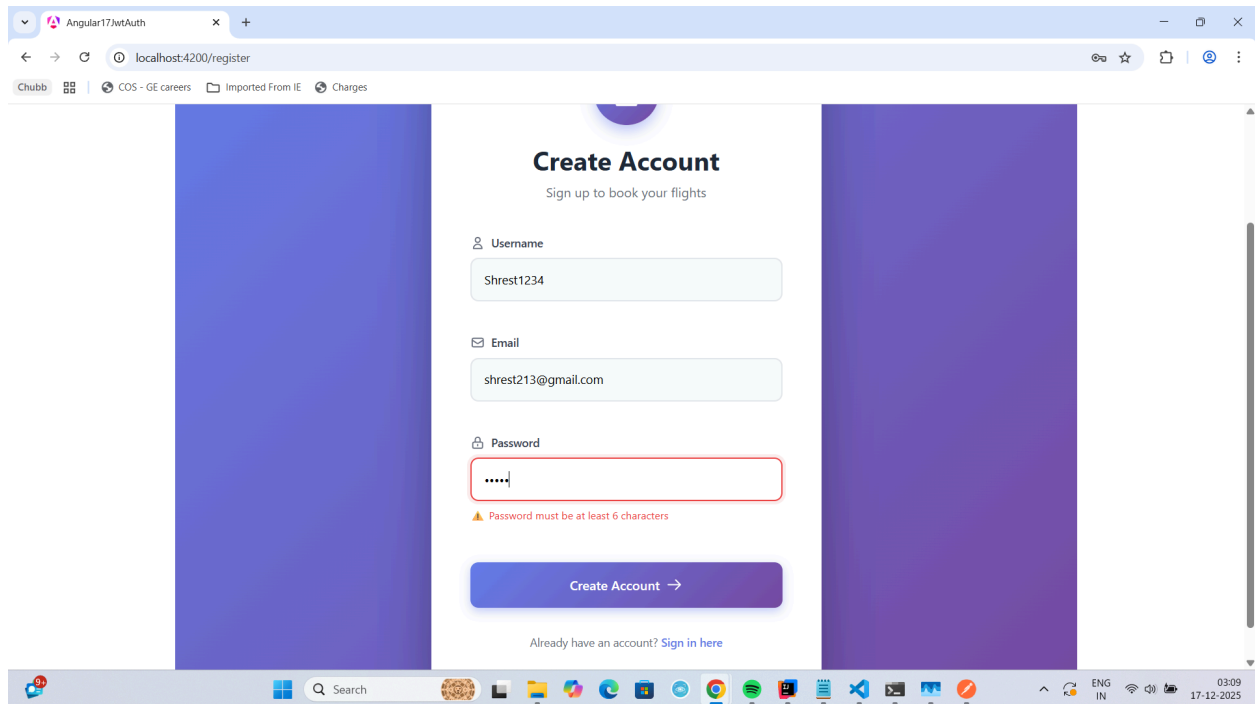

The screenshot shows a web browser window with the URL `localhost:4200/register`. The page title is "Angular17JwtAuth". The form is titled "Create Account" with the subtitle "Sign up to book your flights". It contains three input fields: "Username" (containing "Shrest1234"), "Email" (containing "Enter your email"), and "Password" (containing "*****"). A red border highlights the "Email" field, and a red error message "Email is required" is displayed below it. A blue "Create Account" button with a right arrow is at the bottom. The Windows taskbar at the bottom shows the time as 03:08 on 17-12-2025.

Invalid email format:

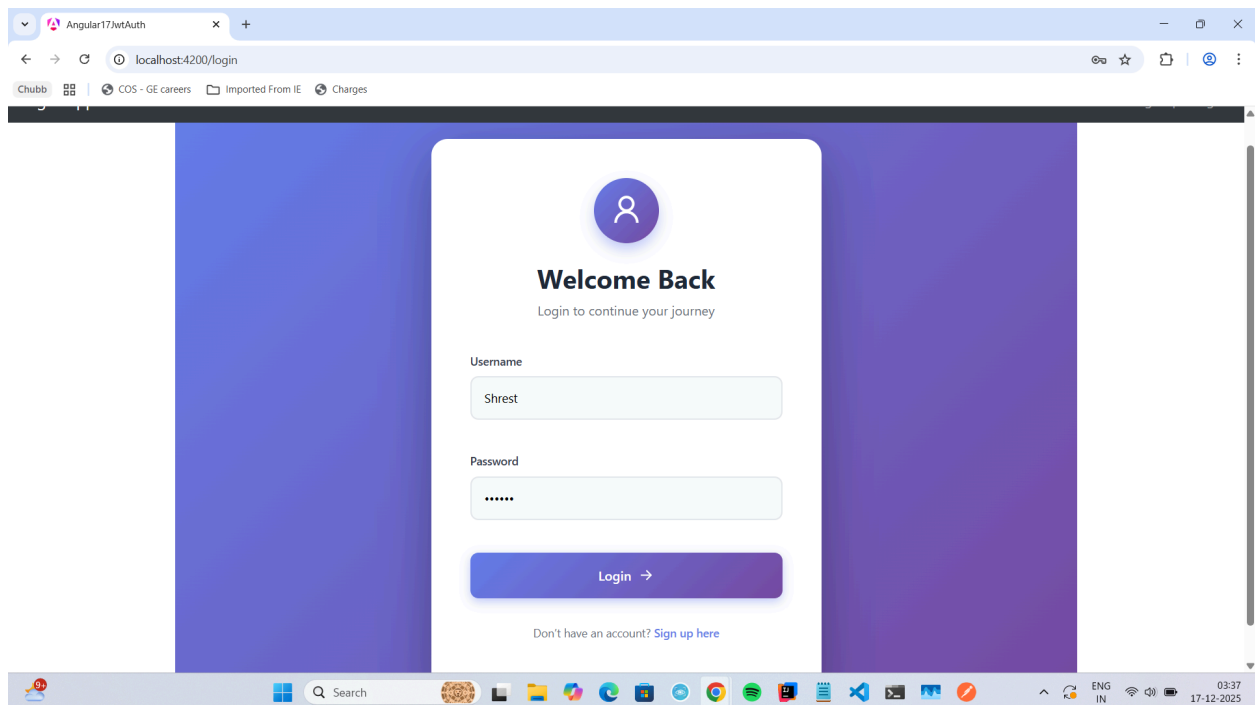

The screenshot shows the same "Create Account" form, but the "Email" field now contains the text "shrest". A red border highlights the field, and a red error message "Please enter a valid email address" is displayed below it. The "Create Account" button remains at the bottom. Below the button, there is a link that says "Already have an account? Sign in here". The Windows taskbar at the bottom shows the time as 03:09 on 17-12-2025.
